

## New Again and the Environment

As a company that strives towards excellent standards in its business operations, New Again recognizes that it has responsibilities and a role to play in protecting the local and global environment and promoting environmental sustainability.

New Again acknowledges that its operations have an effect on the local and global environment; as a consequence of this the company is committed to the continuous improvement of its environmental performance and to the prevention of pollution.

### **Commitment to pollution prevention and legislative compliance**

New Again recognise that in our day-to-day operations we will inevitably have an impact on the Environment. We are committed to minimising this impact and we regard environmental regulations, laws and industry codes of practice as setting the minimum standards of performance.

### **Commitment to championing environmental protection issues**

Because we believe in the importance of what is at stake we are also committed to encouraging our customers to understand environmental issues and to offer them ways of contributing to sustainability projects.

We will also ensure that we will check the approach of our suppliers to environmental issues, and select where we can those who provide products and services that contribute in a positive way to environmental issues.

### **Commitment to continuous improvement**

We are committed to continuous improvements to our practices that impact on the environment and to making a positive contribution to sustainable environmental practices. In particular New Again will:

- Meet and where possible exceed the requirements of relevant legislation. Promote recycling and the use of recycled materials, while reducing the consumption of materials where possible.
- Minimize waste.
- Minimize water and energy use.
- Protect the aesthetic environment by careful design and siting of buildings.
- Respect the wildlife habitats close to our operations.
- Include environmental issues in training programs.
- Encourage our customers to contribute to sustainability projects.
- Keep up to date with the relevant helpful developments and technologies and review their application to the business.
- Monitor progress and regularly review our environmental impact action plan.
